

INSTRUCTIONS OF THE VIDEO GAME: FLYING SAUCER GUL

This game was constructed thinking in furnish a video game easy to use by children with age between 7 and 10 years old, and children with Motor Skills Disorders, who desire use video games, but no present fine motor skills or muscular strength to use a traditional joystick. The visual theme used in the Etoy browser is infantile and the images are large. Children, adults and researchers interested in learn how the scripts were used should benefit it with this game.

How it works

All work only leaving the mouse arrow stopped on top of the joysticks objects to obtain move up or move down. See the figure below:

When you leave the arrow stopped inside the up joystick the flying saucer move up. It is not necessary move the internal button inside the joystick figure. See the next figure.

When you retire the mouse arrow of the joystick the flying saucer stops and realize a continuous circular movement. Choice the direction desired and put the mouse arrow inside the down or up joystick to realize the movement in direction to the red circle at the left of the screen. The final objective is land the spaceship inside circle correctly. To realize this task is necessary patience and skills. GOOD LUCK.
